

CIA SYSTEM 48

Powered by S.A.C. from RML Labs

LESS IS MORE!

If there were a product that embodied that phrase, this is it!

CIA Digital Console Systems present the next generation in Digital mixing consoles, an experience you have to see *AND* hear to believe.

We went to top professionals in the world of live mixing and found out from them just what would be the ideal digital console, then set out to "beat the experts" and deliver a digital console that would "knock their socks off."

And we have done just that!

To begin with and most important of all, the sound of these consoles is unbelievable.

The best way to describe it is "A sound so transparent that it's like an Analog sound with Digital performance."

But we didn't stop there, read about the exciting features below.

Check out this list of features;

1. 48 inputs *AND* outputs.
2. 5 - Band Parametric EQ including high and low pass filters.
3. Compression and Gate available on each channel.
4. Built in effects as well as the ability to patch in your favorite hardware units.
5. Comprehensive yet intuitive scene automation
6. 8 - Master outs plus 16 virtual outs.
7. Full 7-1 Surround sound mixing capability. (*master mix only*)
8. 16 DCAs
9. 6 - Stereo Aux Sends

10. And the **BEST FOR LAST** ... Every one of these features are available on 25 separate virtual consoles!
